

Solve each problem.

1) $\frac{6}{10} - \frac{3}{6} =$

2) $\frac{2}{6} + \frac{1}{4} =$

3) $\frac{2}{3} - \frac{1}{2} =$

4) $\frac{6}{9} + \frac{5}{8} =$

5) $\frac{8}{9} - \frac{1}{7} =$

6) $\frac{6}{10} + \frac{1}{2} =$

7) $\frac{2}{5} - \frac{1}{3} =$

8) $\frac{9}{10} + \frac{8}{9} =$

9) $\frac{4}{6} - \frac{2}{8} =$

10) $\frac{2}{3} + \frac{2}{6} =$

Answers

1. _____
2. _____
3. _____
4. _____
5. _____
6. _____
7. _____
8. _____
9. _____
10. _____

Solve each problem.

1) $\frac{6}{10} - \frac{3}{6} = \frac{18}{30} - \frac{15}{30} = \frac{3}{30}$

2) $\frac{2}{6} + \frac{1}{4} = \frac{4}{12} + \frac{3}{12} = \frac{7}{12}$

3) $\frac{2}{3} - \frac{1}{2} = \frac{4}{6} - \frac{3}{6} = \frac{1}{6}$

4) $\frac{6}{9} + \frac{5}{8} = \frac{48}{72} + \frac{45}{72} = 1\frac{21}{72}$

5) $\frac{8}{9} - \frac{1}{7} = \frac{56}{63} - \frac{9}{63} = \frac{47}{63}$

6) $\frac{6}{10} + \frac{1}{2} = \frac{6}{10} + \frac{5}{10} = 1\frac{1}{10}$

7) $\frac{2}{5} - \frac{1}{3} = \frac{6}{15} - \frac{5}{15} = \frac{1}{15}$

8) $\frac{9}{10} + \frac{8}{9} = \frac{81}{90} + \frac{80}{90} = 1\frac{71}{90}$

9) $\frac{4}{6} - \frac{2}{8} = \frac{16}{24} - \frac{6}{24} = \frac{10}{24}$

10) $\frac{2}{3} + \frac{2}{6} = \frac{4}{6} + \frac{2}{6} = 1\frac{0}{6}$

Answers

1. $\frac{3}{30}$
2. $\frac{7}{12}$
3. $\frac{1}{6}$
4. $1\frac{21}{72}$
5. $\frac{47}{63}$
6. $1\frac{1}{10}$
7. $\frac{1}{15}$
8. $1\frac{71}{90}$
9. $\frac{10}{24}$
10. $1\frac{0}{6}$
