

**Solve each problem.****Answers**

- 1) Henry buys 4 guitar strings, each costing \$2.90. After paying 20 dollars, how much change will he have?
- 2) Victor purchased 2 novels at the bookstore. Each novel cost \$4.05 and he paid with 20 dollars. How much change is due to him?
- 3) Katie selected 3 bracelets from the jewelry store. With each bracelet costing \$5.10 and a payment of 20 dollars, how much change should she expect?
- 4) Gwen bought 2 t-shirts at the clothing store during a big sale. Each t-shirt cost \$4.65 and she paid 20 dollars. What is the amount of change she should receive?
- 5) Lana bought 3 bouquets at the florist. Paying 20 dollars for bouquets priced at \$5.60 each, how much change should she receive?
- 6) Kaleb purchased 2 soccer balls from \"Bob's Sport Supplies\". If each soccer ball costs \$7.70 and he gives the cashier 20 dollars, how much change is he owed?
- 7) Emily is at a store to buy 4 hair accessories, priced at \$2.50. She pays with 20 dollars. How much change should she get?
- 8) Faye needs 4 pencils for school. Each pencil costs \$2.45. She gives the shopkeeper 20 dollars. What amount of change will she receive?
- 9) Billy's dad bought 2 pairs of shoes at the shoe store. If the price per pair is \$6.85 and he pays 20 dollars, how much change should he get back?
- 10) Cody got 2 pet toys at the pet store. If the cost per toy is \$2.95 and he pays 20 dollars, how much change should he expect back?

1. _____
2. _____
3. _____
4. _____
5. _____
6. _____
7. _____
8. _____
9. _____
10. _____

**Solve each problem.****Answers**

- 1) Henry buys 4 guitar strings, each costing \$2.90. After paying 20 dollars, how much change will he have?
 $2.90 \times 4 = 11.60$
- 2) Victor purchased 2 novels at the bookstore. Each novel cost \$4.05 and he paid with 20 dollars. How much change is due to him?
 $4.05 \times 2 = 8.10$
- 3) Katie selected 3 bracelets from the jewelry store. With each bracelet costing \$5.10 and a payment of 20 dollars, how much change should she expect?
 $5.10 \times 3 = 15.30$
- 4) Gwen bought 2 t-shirts at the clothing store during a big sale. Each t-shirt cost \$4.65 and she paid 20 dollars. What is the amount of change she should receive?
 $4.65 \times 2 = 9.30$
- 5) Lana bought 3 bouquets at the florist. Paying 20 dollars for bouquets priced at \$5.60 each, how much change should she receive?
 $5.60 \times 3 = 16.80$
- 6) Kaleb purchased 2 soccer balls from \"Bob's Sport Supplies\". If each soccer ball costs \$7.70 and he gives the cashier 20 dollars, how much change is he owed?
 $7.70 \times 2 = 15.40$
- 7) Emily is at a store to buy 4 hair accessories, priced at \$2.50. She pays with 20 dollars. How much change should she get?
 $2.50 \times 4 = 10.00$
- 8) Faye needs 4 pencils for school. Each pencil costs \$2.45. She gives the shopkeeper 20 dollars. What amount of change will she receive?
 $2.45 \times 4 = 9.80$
- 9) Billy's dad bought 2 pairs of shoes at the shoe store. If the price per pair is \$6.85 and he pays 20 dollars, how much change should he get back?
 $6.85 \times 2 = 13.70$
- 10) Cody got 2 pet toys at the pet store. If the cost per toy is \$2.95 and he pays 20 dollars, how much change should he expect back?
 $2.95 \times 2 = 5.90$

1. **\$8.40**
2. **\$11.90**
3. **\$4.70**
4. **\$10.70**
5. **\$3.20**
6. **\$4.60**
7. **\$10.00**
8. **\$10.20**
9. **\$6.30**
10. **\$14.10**
