

**Solve each problem.****Answers**

- 1) Emily uploaded seventeen pictures from her phone and seven from her camera to Facebook. If she sorted the pics into three different albums with the same amount of pics in each album, how many pictures were in each of the albums?
- 2) A toy store had eighteen giant stuffed bears in stock when they got another shipment with thirty-six bears in it. They put the bears onto shelves with six on each shelf. How many shelves did they use?
- 3) For a birthday party Sam bought five regular sodas and five diet sodas. If his fridge would only hold five on each shelf, how many shelves would he fill up?
- 4) Gwen was making baggies of cookies with nine cookies in each bag. If she had thirteen chocolate chip cookies and fifty-nine oatmeal cookies, how many baggies could she make?
- 5) A vase can hold eight flowers. If you had eight carnations and eight roses, how many vases would you need to hold the flowers?
- 6) Carol and her friends were recycling paper for their class. For every eight pounds they recycled they earned 1 point. If Carol recycled three pounds and her friends recycled twenty-nine pounds, how many points did they earn?
- 7) At a company picnic four managers and thirty-two employees decided to start a game of volleyball. If they split into four teams how many people would be on each team?
- 8) A group of six friends went into a restaurant. The chef already had thirty-seven chicken wings cooked but cooked seventeen more for the group. If they each got the same amount how many would each person get?
- 9) While playing at the arcade, Mike won seven tickets playing 'whack a mole' and twenty-one tickets playing 'skee ball'. If he was trying to buy candy that cost four tickets a piece, how many could he buy?
- 10) The school's debate team had four boys and six girls on it. If they were split into groups of five how many groups could they make?

1. _____
2. _____
3. _____
4. _____
5. _____
6. _____
7. _____
8. _____
9. _____
10. _____
