Name:

Solve each problem.

1) There were eight friends playing a video game online when two more players joined the game. If each player had nine lives, how many lives did they have total?

2) Billy was collecting cans for recycling. On Saturday he filled four bags up and on Sunday he filled two more bags. If each bag had seven cans in it, how many cans did he pick up total?

3) Faye had seven pages of math homework and three pages of reading homework. If each page had six problems on it, how many problems did she have to complete total?

4) Jerry was working as a sacker at a grocery store where he made five dollars an hour. On Monday he worked five hours and on Tuesday he worked three hours. How much money did Jerry make in those two days?

5) Isabel was playing a video game where she scores three points for each treasure she finds. If she found six treasures on the first level and two on the second, what would her score be?

6) April's discount flowers was having a sale where each flower was six dollars. If Paige bought six roses and three daisies, how much did she spend?

7) At Roger's Restaurant a group with three adults and five children came in to eat. If each meal cost seven dollars, how much was the bill?

8) Bianca was organizing her book case making sure each of the shelves had exactly seven books on it. If she had four shelves of mystery books and two shelves of picture books, how many books did she have total?

9) While playing a trivia game, Dave answered eight questions correct in the first half and two questions correct in the second half. If each question was worth eight points, what was his final score?

10) Katie's favorite band was holding a concert where tickets were six dollars each. Katie bought four tickets for herself and her friends and three extra tickets in case anyone else wanted to go. How much did she spend?

1. _____

2. _____

3. _____

4. _____

5. _____

6. _____

7. _____

8. _____

9. _____

10. _____

1-10	90	80	70	60	50	40	30	20	10	0
