

**Solve each problem.****Answers**

- 1) A pet store had ten siamese cats and twenty-six house cats. During a sale they sold six cats. How many cats do they have left?
- 2) While shopping, Robin bought thirty-six green towels and thirty-seven white towels. If she gave her mother two of them, how many towels did Robin end up with?
- 3) Sarah picked forty tulips and forty-seven roses to make flower bouquets. If she only used seventy-nine of the flowers though, how many extra flowers did Sarah pick?
- 4) Faye had thirty-three math problems and forty-five science problems for homework. If she finished forty-one of the problems at school, how many problems did she have to do for homework?
- 5) The school cafeteria ordered ten red apples and twenty green apples for student's lunches. But, if only twenty students wanted fruit, how many extra did the cafeteria end up with?
- 6) Henry started his own lawn mowing business. In the spring he made twenty-six dollars mowing lawns and in the summer he made eighteen dollars. If he had to spend twenty-eight dollars buying supplies, how much money did he end up with?
- 7) Ned had to wash forty-four short sleeve shirts and thirty-two long sleeve shirts before school. If he had only washed sixty-four of them by the time school started, how many did he not wash?
- 8) Cody had nine dollars. For his birthday he got thirty more dollars but spent nineteen on a new game. How much money does he have now?
- 9) At the arcade, Will won thirty-one tickets playing 'whack a mole' and fifteen tickets playing 'skee ball'. If he spent twenty-six of his tickets on a hat, how many tickets does Will have left?
- 10) At the school's book fair Tom bought thirty-nine adventure books and forty-four mystery books. If forty-five of the books were used, how many new books did he buy?
