Solve each problem.

1) Victor bought fourteen boxes of chocolate candy and gave seven to his little brother. If each box has three pieces inside it, how many pieces did Victor still have?

1. _____

2. _____

2) A new building needed twelve windows. The builder had already installed six of them. If it takes four hours to install each window, how long will it take him to install the rest?

3. _____

4. _____

3) A trivia team had twelve members total, but during a game eight members didn't show up. If each member that did show up scored five points, how many points were scored total?

5. _____

6. _____

4) There were seventeen friends playing a video game online when nine players quit. If each player left had four lives, how many lives did they have total?

7. _____

8. _____

5) Janet earned nine points for each bag of cans she recycled. If she had seven bags, but didn't recycle three of them, how many points would she have earned?

9. _____

10. _____

6) At lunch a waiter had ten customers and seven of them didn't leave a tip. If he got $3 each from the ones who did tip, how much money did he earn?

7) Sam earned five dollars for each lawn he mowed. If he had seven lawns to mow, but forgot to mow three of them, how much money did he actually earn?

8) In a video game, each enemy defeated gives you five points. If a level has thirteen enemies total and you destroy all but five of them, how many points would you earn?

9) At a restaurant each adult meal costs $5 and kids eat free. If a group of eleven people came in and nine were kids, how much would it cost for the group to eat?

10) Will invited eleven friends to a birthday party, but six couldn't come. If he wanted to buy enough cupcakes so each person could have exactly seven, how many should he buy?
