Name:

Solve each problem.

1) Given the numbers 44 and 11, how much would you need to add to the smaller number to make it greater than the larger number?

1. _____

2) Given the numbers 9 and 63, how much would you need to add to the smaller number to make it greater than the larger number?

2. _____

3. _____

3) Given the numbers 88 and 28, how much would you need to add to the smaller number to make it even with the larger number?

4. _____

5. _____

4) Given the numbers 18 and 60, how much would you need to subtract from the larger number to make it even with the smaller number?

6. _____

7. _____

5) Given the numbers 90 and 12, how much would you need to subtract from the larger number to make it even with the smaller number?

8. _____

6) Given the numbers 24 and 55, how much would you need to subtract from the larger number to make it even with the smaller number?

9. _____

10. _____

7) Given the numbers 97 and 76, how much would you need to add to the smaller number to make it greater than the larger number?

11. _____

8) Given the numbers 98 and 83, how much would you need to add to the smaller number to make it greater than the larger number?

12. _____

9) Given the numbers 40 and 93, how much would you need to add to the smaller number to make it even with the larger number?

10) Given the numbers 9 and 83, how much would you need to subtract from the larger number to make it even with the smaller number?

11) Given the numbers 28 and 79, how much would you need to add to the smaller number to make it greater than the larger number?

12) Given the numbers 93 and 61, how much would you need to add to the smaller number to make it greater than the larger number?
